Two Way System
9 waves - technique

TWS

TWS, Two Way System

Our most ingenious shaft furnished with our patented waves.

A more rigid forehand side leads to more stingful shots.

A more flexible backhand side strengthens your sense of playing.

T3, T5 and T9 separate the unique shafts through their three, five and nine waves. T3 is the newcomer. Its shaft has been soften even more to bring more sense to the play.

The shaft consists of as much as 85% carbon fibre which results in the ultimate mix of flex, weight and balance.

TWS, your weapon, deadly effective on backhand as well as on forehand!

AIR LIGHT

Unihoc's unique Bubble technology move the flex nearer to the blade. This results in an extra kick to the shot.

News! Now we introduce our new Double Bubble Technique!

A smaller bubble is strategically put under the bigger one. This shortens the distance to the blade even more; the results of the extra kick while shooting is twice as big!

The shaft consists of as much as 85% carbon fibre which results in the ultimate mix of flex, weight and balance.

Air Light suits the sharp shooter defender and the alert striker as well!

Sky Light S1

Blade
ACE soft

Length
92/96 cm
